### Precision Lighting, Like the LAKRI Project

LAKRI is a lighting collection designed for architects and designers who understand that aesthetics and technology should go hand in hand. These linear luminaires impress with their form – but the real value lies in their advanced photometric performance and intelligent control capabilities. Surface-mounted, recessed, suspended, or track-integrated? All available. Tunable White and three light color temperatures? Absolutely. Custom finishes and fine-tuned specifications? Fully configurable.

### Discover more — it's worth it.

Design without compromise – LAKRI is built to support your vision. Performance. Design. Flexibility.
